

ELSEVIER

Comput. Methods Appl. Mech. Engrg. 141 (1997) 407-408

**Computer methods
in applied
mechanics and
engineering**

Contents Volume 141

Volume 141, Nos. 1-2, 15 February 1997

- Finite element analysis of smooth, folded and multi-shell structures
J. Chróścielewski, J. Makowski and H. Stumpf 1
- A comparative study of the discontinuous Galerkin and continuous SUPG finite element methods for computation of viscoelastic flows
F. Yurun 47
- A mixed finite element model for plane strain elastic-plastic analysis. Part I. Formulation and assessment of the overall behaviour
A. Capsoni and L. Corradi 67
- A mixed finite element model for plane strain elastic-plastic analysis. Part II. Application to the 4-node bilinear element
A. Capsoni and L. Corradi 81
- A fixed point iterative algorithm for solving equations modeling the multi-stage flash desalination process
H. El-Dessouky and S. Bingulac 95
- Second-order method of generalized geometric programming for spatial frame optimization
Y. Kang Sui and X. Cheng Wang 117
- Three-dimensional solutions for free vibrations of initially-stressed thermoelectroelastic multilayered plates
K. Xu, A.K. Noor and Y.Y. Tang 125
- On the automation of the force method in the optimal plastic design of frames
K.V. Spiliopoulos 141
- An 8-node brick element with mixed formulation for large deformation analyses
K.P. Li and S. Cescotto 157

Volume 141, Nos. 3-4, 28 February 1997

- Finite element analysis of conjugate natural convection in a square enclosure with a conducting vertical wall
D. Misra and A. Sarkar 205
- Micromechanics of granular media Part II: Overall tangential moduli and localization model for periodic assemblies of circular disks
J.R. Wren and R.I. Borja 221

Complex variable approach to the BEM for multiple crack problems <i>M. Denda and Y.F. Dong</i>	247
An eight-node curvilinear differential quadrature formulation for Reissner/Mindlin plates <i>J.-B. Han and K.M. Liew</i>	265
* Convergence of inexact Newton-like iterations in incremental finite element analysis of elasto-plastic problems <i>R. Blaheta and O. Axelsson</i>	281
On a horizontal version of the inverse pendulum problem <i>Y. Yavin and C. Frangos</i>	297
Some strange properties of minimal surfaces in connection with Plateau's problem <i>V. Visarion and M. Baubec</i>	311
3D mesh adaptation. Optimization of tetrahedral meshes by advancing front technique <i>A. Rassineux</i>	335
Polymorphic constitutive equations in finite element codes <i>R. Foerch, J. Besson, G. Cailletaud and P. Pilvin</i>	355
Large-scale contact/impact simulation and sensitivity analysis on distributed-memory computers <i>B.C. Watson and A.K. Noor</i>	373
Assessments of methods for locating the point of initial yield <i>J. Plešek and A. Křístek</i>	389
